- Data Structures & Algorithms
- Google Cloud
- DevOps
- Machine Learning & Data Science
- Full Stack Web Development

PROJECTS

Car Price Prediction | HTML, CSS, JS, Bootstrap, Flask, PostgreSQL, Supervised learning 05 2022

- Random Forest Regression is used for this model it has 93% accuracy as it was a dataset of year 2019 , additionally we have used standard deprecation formula for getting accurate price as of now.

CarZone | HTML , CSS , JS , Bootstrap ,Django , PostgreSQL 05 2021

- Easy to use car selling website for a car dealer **With the help of django admin panel** , admin could easily update the information of cars and could solve query asked by customers.
- PWA , Google and Facebook login feature , SMTP feature for contacts and queries , pagination and keyword search functionality added

Covid Centre Management System | Java Swing , MySQL

09 2020

- Database Management System is developed for covid centers to maintain covid patients records efficiently.
- Many stunning features are provided to the management system like maintaining covid test records, patients records, medical records, appointment scheduling, staff maintenance record printing Etc.

INTERNSHIP

JNMS IT Committee(ReactJS Developer)

06 2021 – 01 2022

- **Dashboard for transparency of activities in organizations**
 - * The Aim of this project was to give a summary and clear understandings of activities that are happening in the other mobile applications , which were earlier in the form of spreadsheets and it was nearly impossible to get insight from that data
 - * I have created functional based components for dashboard and at the sidebar provided the names of application , after clicking on any of the application , on the dashboard data gets updated asynchronously. and all the times it was same component just data was changing.

TECHNICAL SKILLS

Primary: Java, HTML, CSS, JavaScript, ReactJS, Tailwind CSS, Git, TypeScript, SQL

Familiar: Python, docker, kubernetes, Django, Insomnia

Tried: Linux, aws, Flask, Mongo

CERTIFICATIONS

- **Google Cloud Associate Cloud Engineer**
- Architecting with Google Compute Engine - Coursera
- Google Cloud Skill boost for passionate google cloud learners

Achievements

- * GFG Job-A-Thon exclusive for amazon alexa hiring **Rank 2826 over 50k+ participants**
- * Google Cloud Asia Pacific Cloud hero challenge Winner. **4th Rank**
- * Google Cloud ultimate milestone challenge. **Got selected among top 1000 students to get scholarship for GCP Associate Cloud Engineer**
